

Content Management System

A content management system (CMS) is, as the name suggests, a system used to manage the content of a website.

In layman's terms, it allows the site owner to easily modify their website without the help of a web professional.

How can this help your business?

You can change **your** website at **your** convenience for no additional cost.

What's Included?

The CMS Web Design package price starts at \$2200* including GST and includes 6 pages of content.

* \$99 setup fee applies.

We will create a brand new website that you can self manage.

If you require any extra services, **insilico™** can provide them for an additional charge.

This may include:

- extra pages
- stock images
- hosting
- domain registration

Any future changes to your website, beyond the capabilities provided by our efficient CMS, will incur our standard charges.

For more information on our other services, visit our website:
